EUNICE START CUP

Business competition between the best startup ideas from EUNICE partner universities, annually fostering innovation and entrepreneurship among teams of students from the consortium.

The winning team is awarded a cheque worth € 1,000.

Scan the programme!

UNICT PASSI In Segni

A solution to provide deaf and deafblind individuals with language services, as subtitling, sign language, or lip reading, among other tools.

UPHF Walkbox

An all-in-one mobile device that provides users with maps and other information about their surroundings, in order for them to feel safe or not get lost in an unknown place.

PUT AndanteCaps

A fast-charging and long-lasting energy storage device that introduces hybrid lithium-ion capacitors, which will be more cost-effective than current lithium-ion batteries.

BTU ConStud

An app for university students to connect with each other and make it easier for them to help and support their peers within the same university.

UVA Unicore

A solution to enhance navigation accuracy by deploying a constellation in Low Earth Orbit to deliver positioning navigation and timing services.

IPV Bucket

A digital platform for user-friendly and eco-friendly car washes, where clients can ask service providers to wash their car at a location that suits them best.

UC Green Dog Protect

An enterprise of manufacturing and commercialisation of sustainable pet accessories made of recycled materials and committed to circular economy.

UMONS Guardaxia

A bracelet designed to protect users against aggressors by alerting the emergency contacts of the person wearing it and triggering a loud alarm.

KAU Unbiased Cathode

An intelligent decision-making tool for managing energy within renewable energy communities by combining large language models with optimisation techniques.
